Image models

Build DALL-E directly into your apps to generate and edit novel images and art. Our image models offer three tiers of resolution for flexibility.
[Learn about image generation ↗](#)

Resolution	Price
1024×1024	\$0.020 / image
512×512	\$0.018 / image
256×256	\$0.016 / image

Solution

Example

discourage

[dis|k3:ridʒ]

v. 낙담시키다, 용기를 잃게 하다; 방해하다

discourage further efforts
그 이상의 노력을 못 하게 하다

discourage를 활용한 생동감 있고 간결한 영어 예문 만들어줘

"Don't let failure discourage you; it's just a stepping stone to success."

"Don't let failure discourage you; it's just a stepping stone to success." / cartoon

Problem 2

Passive English Teaching

In language, it is important to create sentences with words, but because example sentences have already been created, it is difficult to create example sentences yourself.

Solution

- Users create their own example sentences and ChatGPT evaluates/corrects them.**
- Create illustrations with Dall-E for example sentences you created**

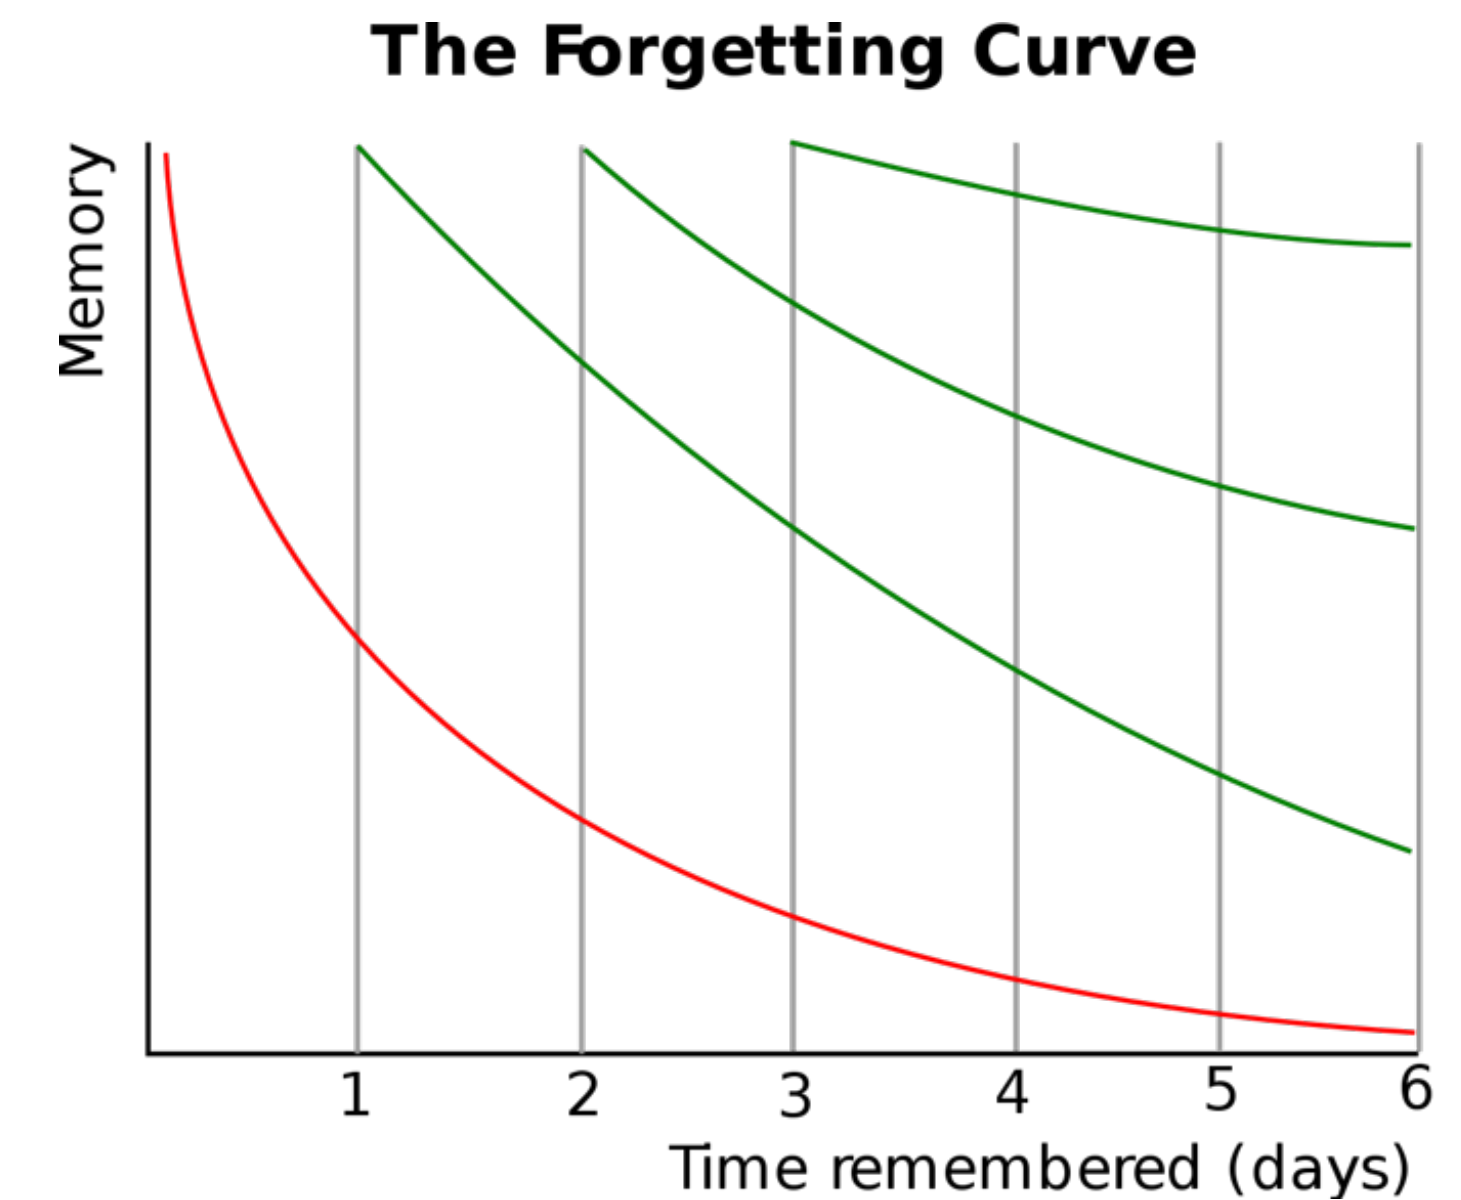

Problem 3

Absence of Review Function

Applications on the market require users to find and review the content themselves.

Solution

- Difficult to find and review on your own
- Based on the forgetting curve, mobile alarm recommendations for words to review based on the most recent study date

Core features of our app

- 1. Recommend words tailored to the user's English level**
- 2-1. Example sentences matching English words are provided**
- 2-2. Or, you can use it by directly entering the example sentence you want**
 - > ChatGPT determines whether the example sentence is appropriate**
- 3. Generate illustrations for example sentences with AI**
- 4. Review function provided**

Expected Difficulties

High API cost for ChatGPT/Dall-E model

Solution

Reuse already created pairs

(word – example sentence – illustration style)
